TRAININGS / CERTIFICATIONS

Software Engineering

Jul 2025 - Jan 2026

NPTEL Swayam, Virtual

This course provided a strong foundation in systematic software development and engineering principles used to build reliable, scalable, and maintainable software systems. I learned the software development life cycle (SDLC), including requirements analysis, system design, implementation, testing, deployment, and maintenance

PROJECTS

[Movie_Recommender_System ↗](#)

Aug 2025 - Sep 2025

"A Movie Recommendation System built with Streamlit that suggests similar movies based on content features. It displays posters, genres, cast, crew, and overviews, helping users easily discover and explore new films they may enjoy.

Jul 2025 - Present

-
- I developed a Spotify-like music streaming app using Flutter and Dart with features like search, category browsing, personalized library, and audio playback.
- Used Provider for managing state, user preferences, and playlists smoothly.
- Built a custom audio player with play, pause, seek, skip, and queue features.
- Added dynamic playlists that can be edited and reordered with drag-and-drop, and saved with persistent storage.
- Followed a clean and scalable folder structure by separating models, services, providers, and widgets.
- Designed a modern and engaging UI/UX with Material widgets and animations.
- Kept the app ready for future integration with online music APIs for real-time streaming.
